Angular, Java, Spring Boot, AWS, Azure, Docker

Open to TPO roles

Hyderabad / Remote / Bengaluru

PROFILE

Technical Product Owner with 7+ years of end-to-end experience spanning product strategy, agile delivery, and hands-on full-stack engineering. Specialized in Angular, Java, and Spring Boot, with AWS Certified Developer and AWS Solutions Architect credentials. Led AI-integrated product builds using GPT-4 and Vertex AI while owning product roadmaps, maintaining sprint health, and translating complex business requirements into shipped features.

EXPERIENCE

Technical Product Owner & Team Lead | HashedIN by Deloitte | Dec 2021 ? Present

- ? Owned the product roadmap and sprint delivery for a Fortune-500 US retailer tax platform, coordinating release planning across 8+ engineers.
- ? Defined backlog structure with user stories, epics, and acceptance criteria aligned to business goals and technical feasibility.
- ? Spearheaded LLM-powered features using GPT-4 and Vertex AI in the media domain with measurable user-outcome goals.
- ? Architected a micro-frontend platform with JSON-driven forms and Azure SSO for modular enterprise delivery.
- ? Led agile ceremonies, mentoring, and architecture reviews to improve predictable, on-time delivery.

Full Stack Developer ? Associate | Cognizant | Sep 2019 ? Nov 2021

- ? Developed Angular 12 UI modules integrated with Spring Boot REST APIs, Bootstrap, and UXC Angular libraries.
- ? Worked with business analysts and tech leads on UX design, achieving stakeholder approval on the first review cycle.
- ? Coordinated with governance teams for compliance review and formal screen approvals.

Backend Developer | Gamenous | May 2019 ? Jul 2019

- ? Built Node.js backend services, integrated third-party APIs, and supported real-time analytics dashboards for user behavior tracking.

KEY PROJECTS

- ? Tax Automation Platform ? US Retail | 2021 ? Present | Sole TPO managing roadmap, backlog, and the end-to-end delivery cycle for a Fortune-500 retailer tax workflow platform.
- ? LLM Content Pipeline ? Media Domain | 2023 ? Present | Led product strategy and engineering for a GPT-4 and Vertex AI powered content generation and recommendation system.
- ? Bank Onboarding Portal | 2020 ? 2021 | Designed and built a multi-role onboarding platform using Angular and Spring Boot with role-based access controls.

CERTIFICATIONS

AWS Certified Developer ? Associate Amazon Web Services

AWS Solutions Architect ? Associate Amazon Web Services
